

SANTIAGO TAPIA BAZÁN

Computer Engineering — 3rd Year (FIE)

Buenos Aires, Argentina | Tel: (+54 911) 2648-5586

Bazan0897@gmail.com | github.com/Santiagotapia989

Third-year Computer Engineering student focused on Backend Development and Process Automation. Hands-on experience in web application development with C#/.NET, REST API design and integration, n8n workflows, and infrastructure/deployment management (DevOps/Render). Passionate about solving real-world problems through code and software optimization.

EDUCATION

Computer Engineering 2024 – Present

Faculty of Army Engineering (FIE) — 3rd year in progress

High School Diploma in Social Sciences 2019 – 2023

Hans Christian Andersen School

RELEVANT PROJECTS

Cybersecurity Hackathon — 1st Place September 2026

CYBER.AR 2026 National Cyberdefense Hackathon — Faculty of Army Engineering (Track 2: AI for network and infrastructure defense)

SIAR — File and Repository Inspection System

- Designed and built an AI-based security tool that acts as a customs checkpoint between third-party repositories/packages and coding AI agents (Cursor, Claude Code, Copilot, MCP), analyzing them in an isolated environment before ingestion.
- Deterministic analyzers (hidden Unicode, prompt injection, typosquatting, leaked secrets via gitleaks) combined with semantic triage powered by a local model (Ollama).
- Custom full-stack architecture: TypeScript engine, API/CLI/MCP server in Node/Express and React 18 + Vite + Tailwind frontend, with printable executive report and human token-based approval.

UCA Hackathon — 1st Place 2023

University and Inter-institutional Sustainable Development Competition

- Ideation and design of an integral solution focused on sustainability and problem solving.
- Collaborative work and decision making under high time pressure with multidisciplinary teams.

Centro Médico Digital — Appointment Management Platform 2026

Personal Project — Full Stack

- Online medical appointment booking with authentication, PostgreSQL (Prisma) and confirmation emails. Next.js 14, React and TypeScript; deployed on Vercel.

Center Print's S.R.L. — Corporate Website & E-commerce Catalog 2026

Personal Project — Full Stack

- Corporate site with dynamic catalog and shopping cart with Mercado Pago checkout. Next.js 14, TypeScript and Tailwind CSS.

PROFESSIONAL TRAINING & EXPERIENCE

Software Development February 2026

Balance Group — Virtual training program for junior profile

- Advanced backend development with C# and .NET Framework.
- Design, documentation and consumption of REST APIs with Swagger / OpenAPI.
- Workflow automation and system integration with n8n.
- Frontend development and web layout with HTML, CSS and JavaScript.
